

Oracle WebCenter Content Connector for ReplixFax

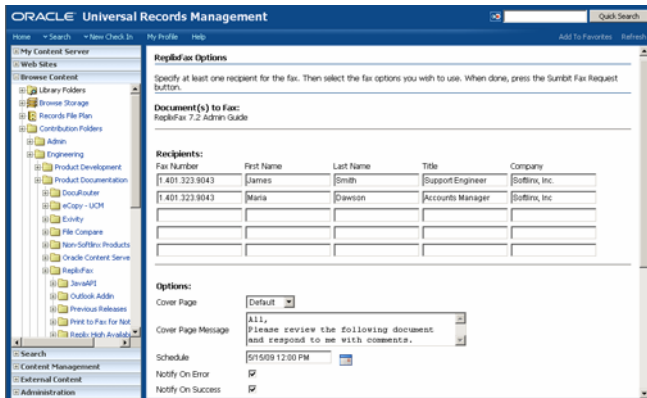

Send and receive urgent business documents via fax directly from Oracle Content Server folders for increased productivity, compliance and immediate document workflow.

The Oracle WebCenter Content Connector for ReplixFax allows you to send a document stored in Oracle WebCenter Content as a fax, and also will store received faxes into Oracle WebCenter Content eliminating manual overhead and saving costs.

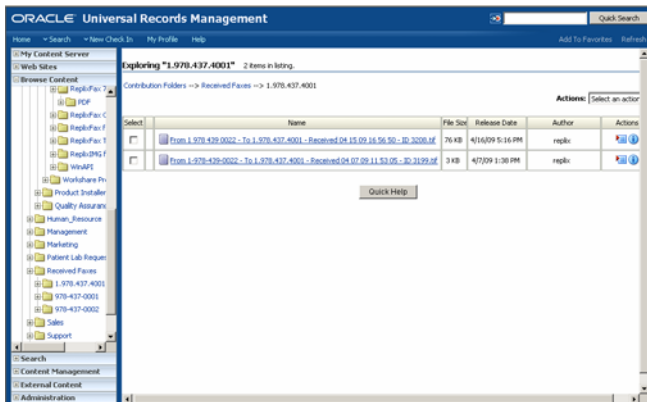

SAMPLE SCREEN SHOTS

Choose *Fax Document* in Content Actions menu to fax a document.

Select fax destination and fax options.

Receive incoming faxes into selected Oracle Content Server folders.

KEY FEATURES

- An easy to install Oracle component natively integrated with the Oracle WebCenter Content Server
