

Oracle WebCenter Content Connector for eCopy ShareScan

Using the Oracle WebCenter Content Connector for eCopy ShareScan, you can scan and index paper documents to Oracle Content Server for immediate storage and document workflow.

The Oracle WebCenter Content Connector for eCopy ShareScan allows you to quickly convert hard copy documents into digital files in Oracle Content Server folders and document workflows. User authentication as well as inputting content information such as Document Type, Security Group, Author and custom metadata can be done at the point of scan. Content information can also be pre-set for each Document Type to minimize the amount of information that must be input at the scanner.

The Oracle WebCenter Content Connector for eCopy ShareScan provides seamless integration between any eCopy ShareScan-enabled MFP devices and Oracle Content Management Solution.

KEY FEATURES AND BENEFITS

- Scan directly from a digital copier or document scanner into Oracle folders
- Include paper documents into digital workflow and document lifecycle management
- Authenticate users at the scan device with electronic audit trail and compliance to corporate security policy
- Configure profiles for departments and workgroups to minimize or eliminate input at the digital copier or document scanner
- Browse Oracle Content Server folders directly from MFP to select check-in location
- Take advantage of a similar user interface to simplify training
- Preview a scanned document prior to Oracle Content Server check-in
- Manage eCopy configuration through Oracle Content Server administration
- Easy to install to any existing eCopy enabled devices

Minimum Requirements
